1 Introduction

Introduction

AL MOKAWANAT INTL, UNITED CO. LTD., "3iSolution" is a technology aspired limited liability Company founded in 1994, Jeddah - Saudi Arabia by Saudi entrepreneurs. The foundation of 3iSoution encountered sensible comprehension of the economical evolution in Saudi Arabia and the region where information technology contributes significant roles. As the founders of 3iSolution experienced the very first introduction of information technology within the Saudi market, they have witnessed how IT operates among emerging markets counting many faces of complications, difficulties and obstacles, and concluded the primary key-success value of 3iSolution, which is introducing the concept of "Total Customer Care" that has many implications on Vendor – Client relationship, 3iSolution wanted to honor the concept of Solutions' provisions in most pragmatic methodologies.

Our Message

Since 1994, 3iSolution has established its footprints in the Saudi Market as Information Technology "Systems' Integrator". Our role is to enrich IT Solutions' Market with products and services put together to advance IT operations for various needs and purposes. With earned credentials of many successes, our horizontal reach grown much further to sustain operations comprising Contracting and Professional Services.

Customers & Partners:

We work closely with our customers and partners on basis that serves their best interests. Our solid adherence to our strategy baseline (Cost Saving & Performance Optimization) allows us to lead our field and sustain long term relations with our clients.

Stakeholders : We strongly value our ethics and business principles in which we consider genuine part of our practice, in order to offer our stakeholders highly reliable and transparent monitory tools; we undertake segregated and decentralized management rules.

Market : Working as a systems' integrator long enough has earned us such sizable experiences that have sharply refined our management, budgeting, load balancing capabilities and skills, thus we got driven towards contracting sector to take on major contracting projects with challenging tasks and have extended our area of expertise to cover several verticals. With vision to sustain our growth and continues development, we aim to lead promising initiatives and successful achievements in three major sectors:

✓ Contracting ✓ Technologies ✓ Services

Strategy : 3iSolution has formed its strategy since the beginning of its practice upon two primary dimensions (Cost Saving & Performance Optimization) this strategy has helped 3iSolution deliver successful technology solutions to hundreds of clients since 1994, 3iSolution made solid covenant throughout its operations to honor the our values.

VALUES

End-User : We work thoroughly to allow end-users sense our personality throughout our provisioning, maintaining our qualities and sustaining our values is a challenging mission with no efforts to spare.

Stakeholders : We value our stakeholders with great respect and appreciation for their contribution and support. 3isolution undertakes advanced and segregated business modeling offering our stakeholders effective finance dynamics.

Partners : 3iSolution leverages stone strong relations with both local and global partners significantly contributing to our provisions. Our partnership strategy defines several means to form extended and most effective affiliations.

Planet : We realize our role and responsibility towards our planet, thus we capitalize on the (Green Technology) products and services.

ETHICS

Social Contribution: We believe that no success becomes worthy unless payback cycle is present, 3iSolution holds a vision for most vulnerable segment of our societies "Disable or handicap people".

Knowledge Sharing: 3iSolution develops several programs for knowledge sharing and skills transfer in aim to offer young calibers great opportunities to earn ground/field experiences.

VISION

Become trustworthy brand for Solutions' provisioning throughout the region and Building strategic affiliations to quantify extended and rewarding investment portfolios.

MISSION

Striving to evolve our major goals:

- Capitalizing on customer relation and sustain our primary values
- Enforcing knowledge grasp and continues development techniques
- Extend our commercial and financial capabilities
- Grow extended investment portfolios

Contracting Division : *"First element of Construction Supply Chain"*

Offering the best design and documentation tools to enforce your decision-making mechanism, "3i MEP Contracting Division" grants MEP design and information modeling with 3D software tools.

Design & Documentation : Qualified architectural engineering capacities are availed for major construction projects formed to enable successful budgeting, installation sequence, maintenance and operation. Our design and documentation activities utilize the knowledge and expertise of global consulting resources solidly empowering our grant.

Power & Material : In realization of the global conscious towards the importance of "earth friendly" concept, 3iSolution have thoroughly structured modern policies introducing alternative energy options in aim towards offering (Green Technology) solutions to the Saudi Market.

Contracting Division : *"Gaining Control over Integration"*

Low Current Systems : We address most vital divisions of Automation Solutions (Security, Safety, Timing, Climate, sound & Video, Monitoring and Data control systems) used for business, manufacturing, storage and hospitality facilities in addition to other types of custom facility functionalities.

"3i Low Current Contracting Division" defines automation and control projects' offerings over 3 major values (Integration – Recovery – Management)

Since 1994, "3i Supplies & Trading Contracting Division" has carried on massive supply projects for IT products and appliances in addition to huge variety of products for various applications, our capacities have grown to conclude highly effective supply mechanism and much broader range of products.

Our roles of supply undertakes certain dynamics such as (Best buying time, best supply terms, forecast and demand sizing) in which enables us to offer our clients (Price Advantage, Maximum Availability and Backup supply)

Technology Division : "22 Years of Field Experience"

- IT architecture Design and Planning:
  - Develop and maintain processes of IT plans answering IT requirements
  - Implementation progress evaluation of all IT strategies and plans
  - Prioritizing technology services
  - Refining systems architecture
  - Systems Integration
  - Setting up research and development dynamics
  - Define IT grand strategy
- Mapping / re-Mapping IT Resourcing
- Assessment and Due diligence Solutions

Technology Division : 3iSolution provides total framework for enterprise IT requirements provisioning, with worlds' most recognized manufacturers and vendors, 3iSolution maintains seamless grant.

- IT Infrastructure Design
- IT Architecture Design and Planning
- Hardware & Software Solutions
- Networking & Communication
- Licensing
- Commissioning & Testing

- Security Systems:
  - Internet and Network Security
  - Standalone Computer Security
  - Data Loss by Accidents
  - PC & Mobile Security
  - Internet Security

- Automation Solution
  - Low Current
  - MEP

Professional Services Division : 3iSolution Setting up PMOs:

3i undertakes "Logical Organization" concept to vastly setup a PMO for your project with dynamics of staffing, allocating resources and budgeting, the Logical Organization process will be triggered once the project definition is concluded.

3i possesses massive data banks, data modeling for effective planning. Along with our practice success elements (Timing, Accuracy, Risk Management & Completeness) our work comprises the following:

- PMO structuring & planning
- Phased implementation roadmap
- PMO framework
- Build methodology, buy and customize methodology
- Skills Training & Couching

We have developed reliable capacities over rolling out numerous projects mostly significant, in addition we have developed dynamic mechanism that takes place upon taking new projects.

With coverage of many business verticals 3i Professional Services Division has substantial and thoroughly structured maintenance & operation offerings.

- Hospitality & recreational facilities
- Healthcare facilities
- Business centers
- Malls

Professional Services Division : Our maintenance agreements are far from simple maintenance, we deliver:

- Cost-effectiveness
- Resources optimization
- Up-time ratios.
- Technology advancements.
- Performance optimization

Facility Management Services : Offering total facility management framework that starts with property inspection and evaluation followed by budget study that defines cost reduction areas:

- Assessment:
  - Energy consumption analysis
  - Hygiene and safety audit
  - Legal and financial audit
- Planning & Management:
  - Periodic monitory reports
  - Tenant relation management & support
  - Financial and legal management
  - Security services
  - Maintenance services

Building upon our experiences, resources and management skills, 3iSolution has developed reliable capabilities to deliver both short-term and long-term facility management services. Our facility management services are defined by certain frameworks:

- 3iSolution Maintenance Services' framework.
- 3iSolution IT Services' framework.
- 3iSolution Project Management.
- 3iSolution "Successful Partner Program"
  - Recruitment "Success Partner"
  - Marketing "Success Partner"
  - Admin "Success Partner"

❑Electro-Mechanical Works:

❑Details:
• Wellcome VIP Lounge : Connected with Airport Central System

❑Scope of Work:
• Supply, Installation, Integration, Testing and Commissioning

Project Name: King Abdullah Sports City Al Jawahar Stadium
Project Type: MEP : Professional Services
Client: Nesma & Partners
Location: Jeddah - Saudi Arabia

Deliverables:

- [ ] MEP Consultancy Services
- [ ] Electro-Mechanical Works
- [ ] Low Current Systems
- [ ] Building Management System
- [ ] Infrastructure
- [ ] Civil Works

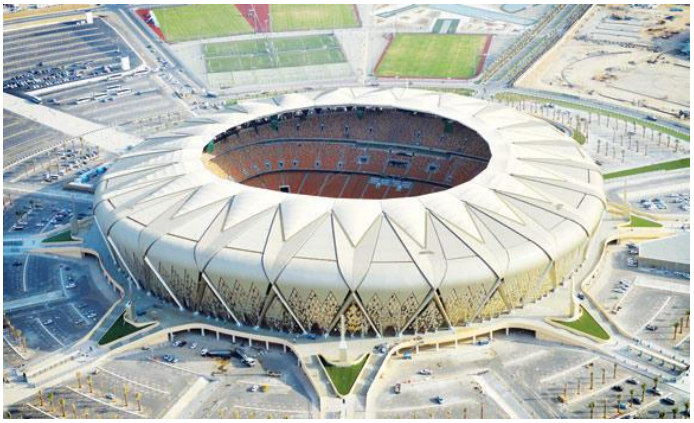
Skills:

- [ ] Security Systems
- [ ] Fire Alarm Systems
- [ ] Integrated BMS
- [ ] Project Management
- [ ] Consulting Services
- [ ] Maintenance & Operation
- [ ] Facilities Management
- [ ] Home Automation
- [ ] GRMS Smart System
- [x] Testing & Commissioning
- [x] Professional Services
- [ ] Data Center
- [ ] Fire Curtains Systems
- [x] Electrical System
- [ ] HVAC System
- [ ] Fire Fighting System
- [ ] Plumbing System

❑Full Electrical Contract:

❑Details:
• Low Voltage & Medium Voltage
• Civil Works - BUS Duct
• Electrical Distribution System (ATS, MDB, SDB, DB)
• Lighting Fixtures & Poles
• Grounding & Lightning System

❑Scope of Work:
• Installation, Integration, Testing and Commissioning



MEP Projects

Project Name: King Abdulaziz University Housing Project : Doctors Villas
Project Type: MEP : Infrastructure - 300 Villas
Client: Rabya General Contractors
Location: Jeddah - Saudi Arabia

Deliverables:

- ☐ MEP Consultancy Services
- ■ Electro-Mechanical Works
- ■ Low Current Systems
- ☐ Building Management System
- ■ Infrastructure
- ■ Civil Works

Skills:

- ☐ Security Systems
- ☐ Fire Alarm Systems
- ☐ Integrated BMS
- ☐ Project Management
- ☐ Consulting Services
- ☐ Maintenance & Operation
- ☐ Facilities Management
- ☐ Home Automation
- ☐ GRMS Smart System

- ☐ Fire Fighting System
- ☐ Plumbing System

❑Network & Electrical Infrastructure

❑Details:
• Electrical Infrastructure

❑Scope of Work:
• Full Infrastructure Solution
• Supply, Installation, Integration, Testing and Commissioning

Project Name: King Road Tower
Client: United Company
Project Type: Low Current : Full IT & Smart Systems
Location: Jeddah - Saudi Arabia

Deliverables:

- ☐ MEP Consultancy Services
- ☐ Electro-Mechanical Works
- ■ Low Current Systems
- ■ Building Management System
- ■ IT Infrastructure
- ☐ Civil Works

Skills:

- ■ Security Systems
- ■ Fire Alarm Systems
- ■ Integrated BMS
- ■ Project Management
- ■ Consulting Services
- ■ Maintenance & Operation
- ☐ Facilities Management
- ☐ Home Automation
- ☐ GRMS Smart System
- ■ Testing & Commissioning
- ■ Professional Services
- ■ Data Center
- ■ Fire Curtains Systems
- ■ Electrical System
- ☐ HVAC System
- ☐ Fire Fighting System
- ☐ Plumbing System

❑Full Electrical Contract Consists of:

❑Details:
• Full Automation Building (Offices)

❑Scope of Work: Full Integration
• Systems Integration with MEP
• Facility Management System
• Supply, Installation, Integration, Testing and Commissioning
• Maintenance & Support Services

Low Current Projects

Project Name: Casablanca Grand Hotel
Client: Casablanca Group
Project Type: Low Current : Full IT & Smart Systems
Location: Jeddah - Saudi Arabia

Deliverables:

- ☐ MEP Consultancy Services
- ☐ Electro-Mechanical Works
- ■ Low Current Systems
- ☐ Building Management System
- ■ Infrastructure
- ☐ Civil Works

Skills:

- ■ Security Systems
- ■ Fire Alarm Systems
- ☐ Integrated BMS
- ■ Project Management
- ■ Consulting Services
- ■ Maintenance & Operation
- ☐ Facilities Management
- ☐ Home Automation
- ■ GRMS Smart System
- ■ Testing & Commissioning
- ■ Professional Services
- ■ Data Center
- ■ Fire Curtains Systems
- ☐ Electrical System
- ☐ HVAC System
- ☐ Fire Fighting System
- ☐ Plumbing System

❑Full Low Current System Contract:

❑Details:
- Number of Rooms : 125

❑Scope of Work:
- Full Systems Integration Electrical & Mechanical
- Complete Network Integration
- Supply, Installation, Integration, Testing and Commissioning
- Maintenance & Support Services

Project Name: Bay La Sun Hotel & Marina
Client: GBEC
Project Type: Low Current : Full Smart Systems
Location: King Abdullah Economic City
Rabigh - Saudi Arabia

Deliverables:

- ☐ MEP Consultancy Services
- ☐ Electro-Mechanical Works
- ■ Low Current Systems
- ☐ Building Management System
- ■ IT Infrastructure
- ☐ Civil Works

Skills:

- ■ Security Systems
- ■ Fire Alarm Systems
- ☐ Integrated BMS
- ■ Project Management
- ■ Consulting Services
- ☐ Maintenance & Operation
- ☐ Facilities Management
- ☐ Home Automation
- ☐ GRMS Smart System
- ■ Testing & Commissioning
- ■ Professional Services
- ■ Data Center
- ☐ Fire Curtains Systems
- ☐ Electrical System
- ☐ HVAC System
- ☐ Fire Fighting System
- ☐ Plumbing System

❑Low Current Systems:

❑Details:
- Number of Rooms : 190

❑Scope of Work:
- Systems integration
- Supply, Installation, Integration, Testing and Commissioning

Low Current Projects

Project Name: AECOM Company
Client: AECOM
Project Type: Low Current : Smart Systems
Location: Jeddah - Saudi Arabia

Deliverables:

- ☐ MEP Consultancy Services
- ☐ Electro-Mechanical Works
- ■ Low Current Systems
- ☐ Building Management System
- ■ Infrastructure
- ☐ Civil Works

Skills:

- ■ Security Systems
- ☐ Fire Alarm Systems
- ☐ Integrated BMS
- ■ Project Management
- ■ Consulting Services
- ☐ Maintenance & Operation
- ☐ Facilities Management

- ☐ HVAC System
- ☐ Fire Fighting System
- ☐ Plumbing System

❑Low Current Project:

❑Details:
- Infrastructure

❑Scope of Work:
- Supply, Installation, Integration, Testing and Commissioning
- Maintenance Support & Services

Low Current Projects

Project Name: Rafal Tower
Client: Rafal Real Estate Development Co.
Project Type: Low Current : GRMS Systems
Location: Riyadh - Saudi Arabia

Deliverables:

- ☐ MEP Consultancy Services
- ☐ Electro-Mechanical Works
- ☐ Low Current Systems
- ☐ Building Management System
- ☐ Infrastructure
- ☐ Civil Works

Skills:

- ■ Security Systems
- ☐ Fire Alarm Systems
- ☐ Integrated BMS
- ☐ Project Management
- ☐ Consulting Services
- ■ Maintenance & Operation
- ☐ Facilities Management
- ☐ Home Automation
- ■ GRMS Smart System
- ■ Testing & Commissioning
- ■ Professional Services
- ☐ Data Center
- ☐ Fire Curtains Systems
- ☐ Electrical System
- ☐ HVAC System
- ☐ Fire Fighting System
- ☐ Plumbing System

❑Low Current & Security System:

❑Details:
- Guest Room Management System
- Automatic Rising Krebs System
- Electrical Panels

❑Scope of Work:
- Full Integration with Security System
- Maintenance Support Services
- Network System
- Installation, Integration, Testing and Commissioning
- Maintenance Support & Services

Project Name: Rabigh Refinery
Client: (Aramco) Nesma & Partners
Project Type: Low Current : IT & Low Current Systems
Location: Rabigh - Saudi Arabia

Deliverables:

- ☐ MEP Consultancy Services
- ☐ Electro-Mechanical Works
- ■ Low Current Systems
- ☐ Building Management System
- ■ IT Infrastructure
- ☐ Civil Works

Skills:

- ■ Security Systems
- ■ Fire Alarm Systems

«سيسكو سيستمز» تطور البنية التحتية لشبكة اتصالات «دار الأركان»

الرياض - إبراهيم الجردان:

صرح الدكتور بدر البدر، مدير عام شركة سيسكو سيستمز في السعودية، المتخصصة في مجال توفير حلول الشبكات المتكاملة، عن الانتهاء من تحويل مقر شركة دار الأركان، أكبر شركة لتطوير الوحدات السكنية في المملكة، من خلال التعاون مع شريك سيسكو سيستمز السعودية (شركة Solution3 ، إلى مقر يعتمد بالكامل على التجهيزات التقنية الحديثة لحلول برامج الاتصال الشبكي المتكامل التي من خلالها يتم نقل الصوت والصورة والمعلومات من خلال شبكة واحدة متكاملة ، حيث قامت سيسكو بتزويد مقر الشركة بالرياض ب 400 هاتف يعمل بنظام الهاتفية عبر بروتوكول الإنترنت .(IP telephony)

وأضاف البدر قائلاً: «إن حلول الاتصال الشبكية المتكاملة التي زودت بها دار الأركان تعمل من خلال شبكات الاتصالات المحلية LAN وشبكات الاتصال العريضة WAN التي ينفذ من خلالها برنامج الهاتف الشبكي «آي بي تي IPT » لتوفير الإتصال داخل المبنى الرئيسي للشركة ومع فروعها المنتشرة في أنحاء المملكة، وسوف تسهم تلك الحلول الجديدة في زيادة الانتاجية وتحسين الأداء وإدارة الوقت بشكل عملي. وهذه المزايا من أهم ما تبحث عنه شركات هذا القطاع الهام والحيوي في المملكة، حيث يسعى القطاعين العام والخاص إلى التبني الشامل للتقنية الرقمية في مجال الاتصالات والمعلومات، خاصة في ظل سعي الحكومة إلى التحول الرقمي الشامل لتعزيز الانتاجية والتنافسية في عالمنا المعاصر، لاسيما بعد انضمام المملكة إلى منظمة التجارة العالمية وظهور الحاجة الملحة من جانب مختلف قطاعات الأعمال التجارية إلى التطور من أجل تعزيز فرصها التنافسية في السوق المحلية والإقليمية .»

بدوره أعرب عليان العتيبي، مدير تقنية المعلومات بشركة دار الأركان عن سعادته بانتهاء تنفيذ هذا المشروع التقني في مقر الشركة بالكامل مما سيسهم في زيادة الانتاجية للشركة التي تعد من الأعمدة الرئيسية في بناء صناعة التطوير العقاري في السعودية، منوهاً إلى أن سيسكو سيستمز تعد حليف هذا النجاح الذي تحقق مؤخراً .

أضاف العتيبي: «لقد عملت معنا سيسكو السعودية عن كثب لتطوير البنية التحتية لمقر دار الأركان الرئيسي، بحيث تعتمد كلياً على برامج الاتصال الشبكي وحلول الاتصال التي تقدمها سيسكو سيستمز لعملائها في السعودية. وقد أصبح مقرشركة دار الأركان بمثابة تجربة واقعية ومثال حي في مجال نشر واستخدام التقنية في البنية التحتية للمشروعات العقارية.»

RESELLER FOCUS

//PROFILING THE REGION'S TIER-ONE SPECIALISTS

3i SOLUTION IN NO MOOD TO RELAX

3i Solution has carved out a reputation as one of the leading infrastructure providers in the Saudi channel, developing an expertise in building, designing and implementing infrastructure solutions for enterprise organisations. Its focus for the rest of the year is very much on stamping its authority on a local market enjoying explosive growth.

>> 3i Solution prides itself on being able to provide the full works when it comes to meeting a customer's infrastructure needs, whether it's implementing more conventional cabling and switching equipment or high-end datacentres and the latest enterprise servers.

With 16 years' experience in the field, the company can certainly claim to know what corporate customers want when it comes to complex IT deployments. Its work in the healthcare sector — private rather than government — has seen it win projects with a number of clients, including Jeddah National Hospitals, where it delivered a state of the art data centre based on Sun Microsystems servers. It also operates in the hospitality and oil and gas verticals, while its exploits in the finance sector have resulted in major implementations at the National Commercial Bank and Riyadh Bank among others.

The burgeoning growth of the real estate and construction sector is now encouraging the firm to aggressively focus on this market and initiate talks with international building management systems (BMS) suppliers. "We find that there is a lack of resources on building management systems, which control all the facilities inside the buildings," explained Naser Kanan, deputy general manager at 3i Solution. "We are building these on IT so we have to find a BMS that will interface with the IT. There is a real boom happening with real estate and construction in Saudi Arabia. There are a lot of smart buildings being developed and these require the very latest technology, which is why we are engaging with the contractors and looking at what can be deployed."

The pace of transformation in the overall Saudi market is reflected by 3i's recent internal growth. More than 75 employees now work for the company, and around 30 of those have been brought on board during the past 18 months. With the company heavily involved in many enterprise-level projects, the need for new staff in sales, pre-sales and technical functions is as prominent as ever.

Kanan also calls on vendors to demonstrate their commitment to the Saudi market with concrete actions. "The most important thing is that they have a solid presence, rather than running the business remotely," he declared. "This market needs somebody here; it cannot be handled by one or two guys. Stocking is also important — do they have the stock in country that will allow us to execute a project in the required timeframe? Sometimes it takes 10 to 12 weeks for stock to be delivered. And if there are customs issues then it can take 14 to 16 weeks. Vendors need to know that if they can't deliver they will lose the opportunity because the market won't wait. Their quotation will be accepted, but they won't make the shortlist. But if they can stock and provide the service we need then they will be my preferred partner."

3i has its headquarters and a branch office in Jeddah, as well as a separate office in Riyadh. Outside of its homeland, the company also boasts an operation in Dubai. And it is adamant that the UAE is just the tip of the iceberg when it comes to its Middle East strategy. "Part of our vision is that we are going to expand into Jordan and Egypt, as well as Lebanon when the situation has settled down," revealed Kanan.

Even if those plans don't bear fruit in the immediate future, it seems the company has enough on its plate to keep it occupied in Saudi for a long while yet.

3i SOLUTION

أخبار الشركات

اتفاقية شراكة بين شركة المكونات 3iSolution وكوانتوم أوتوميشن

أعلنت حديثًا شركة المكونات 3iSolution، وهي احدى شركات التقنية السعودية، عن عقدها لشراكة مع شركة كوانتوم أوتوميشن المحدودة Quantum Automation Ltd السنغافورية، وذلك لتقديم أحدث التطورات في أنظمة الأمن والصيانة والتحكم في أنظمة الهواء في الأبنية.

إذ أن الأنظمة المتكاملة لإدارة المباني، والتي وصفت بأنها شبكة من الأجهزة الإلكترونية صممت للمراقبة والتحكم في جميع جوانب المباني، وينشأ عن استخدام هذه الأنظمة ما يسمى بالمباني الذكية، تضمن مراقبة الأمن، والجو، ومستويات الطاقة عن كثب.

وباعتبارها من الشركات المتخصصة في هذا المجال، رسخت شركة كوانتوم أوتوميشن اسمها في العالم من خلال تنفيذها لمشاريع كبرى في الهند وإندونيسيا ودبي. ومع ذلك، يعتقد عبدالرحمن قنزل، مدير عام شركة ثري آي سوليوشن، بأن هذه الشراكة ستمكن من الاستفادة من الإمكانيات الكبيرة القائمة في سوق التطوير العقاري في السعودية.

وقال عبدالرحمن: "لقد استغرقنا وقتاً طويلاً في إجراء الأبحاث حول حجم الفرص المتاحة، ونعتقد بأن حجم السوق السعودية يساوي أكثر من 1.5 مليار دولار خلال السنوات الخمس المقبلة. وفي ظل الاستثمارات المالية الضخمة التي تضخ في المدن الاقتصادية الجديدة، وتوجهات الحكومة لتبني التقنية وأنظمة المباني الذكية، فإننا على ثقة بأن هذا الوقت هو الوقت الملائم لإطلاق أنظمة متكاملة لإدارة المباني في المملكة العربية السعودية".

ولشركة كوانتوم أوتوميشن المتخصصة في أنظمة المباني تواجد في ماليزيا والصين والولايات المتحدة الأمريكية والإمارات العربية المتحدة، أما شركة المكونات فستكون ممثلة لشركة كوانتوم من خلال عملياتها في المملكة العربية السعودية.

وتوفر الشركة مجموعة متنوعة من الحلول للأنظمة المتكاملة لإدارة المباني، بما في ذلك دوائر المراقبة التلفزيونية المغلقة CCTV، وأنظمة العرض العامة، وأنظمة إنذار الحريق، وعناصر التحكم الأخرى في المباني مثل أنظمة الصوت والاتصالات، وأنظمة الأمن والدخول، بالإضافة إلى توفير خدمة الدعم والصيانة للعملاء.

ويعمل مهندسون من شركة المكونات ومن كوانتوم أوتوميشن أيضا مع المطورين والمهندسين المعماريين لإسداء النصح وتقديم المشورة في الهندسة وتصميم المشاريع منذ بدء المشروع كفكرة وحتى الانتهاء منه، بما في ذلك مرحلة الاختبار والتسليم.

ومن جانبه قال جيم تشوا، مدير عام كوانتوم أتوميشن: "إن الحلول المتكاملة لإدارة المباني iBMS هي أحدث وأتم الأنظمة التي تعمل على إدارة جميع الخدمات في مبنى معين. والفوائد التي تقدمها هذه الأنظمة لأصحاب المباني ولمستخدميها فوائد جمة، ونعتقد بأن بلدا مثل المملكة يجب أن تكون من الدول التي تشجع على تبني هذه التقنية التي تدل على تفكير مستقبلي".

ومن أبرز المشاريع التي تضطلع كوانتوم أوتوميشن بتنفيذها حالياً تنفيذ مشروع لتركيب أحدث الأنظمة الذكية لإدارة المباني والتحكم بها في جامعة سنغافورة. ويمكن الحل إدارة جامعة الإدارة في سنغافورة من المراقبة والتحكم في الدخول لمباني ومرافق الجامعة، من خلال التكامل مع نظام حجز المرافق.

ويمكن ذلك من ترشيد استهلاك الطاقة، إذ يتم تشغيل أجهزة تكييف الهواء والإنارة في المرافق خلال فترة استخدامها عن طريق النظام المتكامل لإدارة المباني iBMS. وبالإضافة إلى ذلك، يسمح النظام للجامعة بإدارة استخدام الطاقة، والتحكم في الأمن في جميع مرافقها، مثل أخطار الحريق. وقد نفذت كوانتوم أوتوميشن العديد من المشاريع الكبيرة في العالم.

وشركات الإنشاءات، بهدف تطوير حلول فريدة من نوعها تناسب السوق السعودية. وباعتبار الشركتان من الشركات المتخصصة في هذا المجال، وتهدف شركة المكونات وكوانتوم أوتوميشن لزيادة الوعي في السوق بهذه التقنية المبتكرة في مجال تقنية البناء والإنشاءات.

3i Solution and Quantum Automation sign partnership for Saudi integrated building management systems (IBSMs)

Author: Moussa Ahmad

Source: BI-ME

Published: 12-06-2008

SAUDI ARABIA. One of Saudi Arabia's leading IT providers 3i Solution Co recently announced a partnership with Singapore-based Quantum Automation to deliver the very latest developments in security, maintenance, and climate control systems to building owners in the Kingdom.

Integrated Building Management Systems, or iBMS, has been described as a network of electronic devices designed to monitor and control all aspects of premises. Integrated Building Management Systems create intelligent buildings, ensuring that security, climate, and energy levels are all closely monitored.
As a leader in the field Quantum Automation has established its name across the globe with key projects in India, Indonesia, and Dubai. However, 3i Solutions General Manager Abdulrahman Qanzal believes that the partnership will be able to tap into the huge potential for building projects in the Kingdom.

"We have spent a long time researching the size of the opportunities, and we believe that the Saudi market is worth over US$1.5 billion over the coming five years. With the massive investment being put into the new economic cities and the push from the government to adopt technology and smart building systems, we are convinced that now is the right time to launch Integrated Building Management Systems in Saudi Arabia," said Abdulrahman.

The leader in building automation in South East Asia, Quantum Automation has presence in Malaysia, China, the US, United Arab Emirates and 3i Solution will add to network with its operations in the Kingdom of Saudi Arabia.
Quantum provides a complete assortment of solutions for integrated building management systems, including CCTV, public address, public display systems, fire alarm and other building control elements such as voice and communication systems, security and access control, as well as service support and maintenance for customers.
Engineers from 3i Solutions and Quantum Automation will also work with developers and architects to provide advice in engineering and product design from the project inception stage up until completion, including testing and commissioning.

"Integrated Building Management Solutions is the latest, the most complete system for managing all the services in a building. The benefits that it can provide to building owners and users are immense, and we believe that a country such as Saudi Arabia should be and will be a wholesale adopter of this forward thinking technology," said Quantum Automation Managing Director Jimmy Chua.
One of the highly acclaimed projects undertaken by Quantum Automation is the implementation of a state-of-the-art intelligent building management and controls systems within a university in Singapore. The solutions suite allows the Singapore Management University to monitor and provide access control to the buildings within its campus through the integration of the Facility Booking System.
This allows for energy optimisation as the air-conditioning and lighting of the facility will only be switched on during the usage period via the iBMS integration. In addition, the systems also allow the university to manage the energy usage and all crucial security of its premises such as fire hazards.
Quantum Automation has implemented many other major projects worldwide.
Working together, 3i Solutions and Quantum Automation will roll out a series of roadshows targeting developers and construction companies aiming to develop unique solutions for the Saudi market. As pioneers in this space, 3i Solutions and Quantum Automation aim to educate the market about this breakthrough in construction and building technology.

From left to right: Ahmed Farrag, Saudi Arabia country manager, Sun Microsystems Middle East and North Africa; Julien Durand, general manager, FRONTLINERS; Naser Kanan, Jeddah branch manager, 3i Solution, and Abdulrahman Al Qanzal, general manager, 3iSolution.

The new technology infrastructure, which includes the initial provision of 50 Sun Ray thin clients, will enable staff at the 24-hour call centre run by FRONTLINERS, to provide voice, email, fax and SMS outsourced solutions for different companies in the country. Staff at the multi-channel, multi-lingual call centre which is staffed by Saudi nationals, can handle between more than 15,000 calls a day. FRONTLINERS customers will now be able to receive daily online reports and will also be offered data warehousing and business intelligence services as result of the Sun deployment. "We needed a world class solution in place to support the requirements of our customers and give them the best that technology can bring in terms of security, productivity, and reliability" said Julien Durand, general manager, FRONTLINERS. "The solution we have implemented also allows us to provide value added services, differentiating ourselves from other operators in the Kingdom. "System reliability and security were important considerations for us when we examined different vendors. Sun's offering, combined with the support and implementation plans of 3iSolution made them an attractive choice for us."

FRONTLINERS has installed 50 Sun Ray desktops and associated software, but senior executives at the company anticipate rapid growth for their services, and expect to increase the number of employees to 224 by 2006. "The IT infrastructure solution in place will enable FRONTLINERS to provide its clients with a unique service," said Abdulrahman Al Qanzal, general manager, 3iSolution. "And as the business grows, and the number of employees increases, Sun's technology will be in place to support growth."
FRONTLINERS evaluated proposals from a number of other IT vendors, before opting for Sun, whose powerful and space saving Sun Ray thin clients and streamlined software solution matched the short and long term requirements of FRONTLINERS. The contact centre provider was able to evaluate a live mock-up of the solution at Tech Access' million dollar i-Force test centre located at its Dubai Internet City offices.

"Ensuring the constant availability of mission critical data is perhaps even more important for a call centre, where hundreds of requests for information, support and advice are made on an

3i Solution, Quantum sign partnership

RIYADH – 3i Solution Co Ltd, one of Saudi Arabia's leading IT providers, recently announced a partnership with Singapore-based Quantum Automation Pte Ltd (Quantum Automation) to deliver the very latest developments in security, maintenance, and climate control systems to building owners in the Kingdom.

Integrated Building Management Systems, or iBMS, has been described as a network of electronic devices designed to monitor and control all aspects of premises -integrated building management systems create intelligent buildings, ensuring that security, climate, and energy levels are all closely monitored.

As a leader in the field Quantum Automation has established its name across the globe with key projects in India, Indonesia, and Dubai. However, 3i Solution General Manager Abdulrahman Qanzal believes that the partnership will be able to tap into the huge potential for building projects in the Kingdom

"We have spent a long time researching the size of the opportunities, and we believe that the Saudi market is worth over $1.5 billion over the coming five years. With the massive investment being put into the new economic cities and the push from the government to adopt technology and smart building systems, we are convinced that now is the right time to launch Integrated Building Management Systems in Saudi Arabia," said Abdulrahman.

The leader in building automation in South East Asia, Quantum Automation has presence in Malaysia, China, the USA, United Arab Emirates and 3i Solution will add to network with its operations in the Kingdom.

Quantum provides a complete assortment of solutions for integrated building management systems, including CCTV, public address, public display systems, fire alarm and other building control elements such as voice and communication systems, security and access control, as well as service support and maintenance. – Agencies

Engineers from 3i Solutions and Quantum Automation will also work with developers and architects to provide advice in engineering and product design from the project inception stage up until completion, including testing and commissioning.

"Integrated Building Management Solutions is the latest, the most complete system for managing all the services in a building. The benefits that it can provide to building owners and users are immense, and we believe that a country such as Saudi Arabia should be and will be a wholesale adopter of this forward thinking technology," said Quantum Automation Managing Director Jimmy Chua.

Working together, 3i Solutions and Quantum Automation will roll out a series of roadshows targeting developers and construction companies aiming to develop unique solutions for the Saudi market. As pioneers in this space, 3i Solutions and Quantum Automation aim to educate the market about this breakthrough in construction and building technology.

As the Sun Ray thin clients go live (from left) Ahmed Farrag, Saudi Arabia country manager, Sun Microsystems MENA; Julien Durand, GM, Frontliners; Naser Kanan, Jeddah branch manager, 3i Solution; and Abdulrahman Al-Qanzal, GM, 3iSolution.

Sun Ray Thin Clients Deployed in Jeddah

In cooperation with 3iSolution, its in-country Saudi systems integrator, and regional channel development provider Tech Access, Sun Microsystems has successfully deployed an innovative and far-reaching hardware and software solution at a Jeddah call center operated by service provider Frontliners. The new technology infrastructure, which includes the initial provision of 50 Sun Ray thin clients, will enable staff at the 24-hour call center to provide voice, e-mail, fax and SMS outsourced solutions for different companies in Saudi Arabia.

The multichannel, multilingual call center staffed by Saudi nationals, can handle more than 15,000 calls a day. Frontliners customers will now be able to receive daily online reports and will also be offered data warehousing and business intelligence services as a result of the Sun deployment.

"We needed a world class solution in place to support the requirements of our customers and give them the best that technology can bring in terms of security, productivity and reliability," said Julien Durand, GM, Frontliners. "The solution we have implemented also allows us to provide value-added services, differentiating ourselves from other operators in the Kingdom. System reliability and security were important considerations for us when we examined different vendors. Sun's offering, combined with the support and implementation plans of 3iSolution made them an attractive choice for us."

Frontliners has installed 50 Sun Ray desktops and associated software, but senior executives at the company anticipate rapid growth for their services and expect to increase the number of employees to 224 by 2006.

Cisco and 3i Solution win real estate project

Dar Al Arkan's Riyadh headquarters fitted with a 400 unit Cisco IP telephony solution

Dar Al Arkan, one of the Kingdom's largest real estate companies, has opted for a complete IP telephony solution at its Riyadh HQ. Employing one of Saudi's largest solution providers, 3i Solution, Dar Al Arkan has successfully piloted the project and has rolled out 400 IP telephony phones across its main offices in the Kingdom.

Abdulrahman Al Qanzal, general manager of 3i Solution, claims that the deal is a sign of business to come in Saudi's buoyant real estate sector. With a number of huge projects in the planning stages, Al-Qanzal claims that the IT industry should start looking at the potential of this sector.

"We have been working closely with Dar Al Arkan to implement the IP solution on the company's wide area network. This is the first step in Dar Al Arkan's strategy of using technology to improve the experience of its end-users, and they have already made full use of the IP solution in their headquarters to improve their everyday business needs."

Based on Dar Al Arkan's local area network, Cisco's IP telephony solution will be connected via IPT communications technology to Dar Al Arkan's branch offices around the Kingdom, helping to boost the company's competitiveness against both local and international competition through cost savings and improved communications.

As one of Cisco s most prominent local partners, 3i Solution has been leading efforts to win companies over to IP telephony. Al Qanzal believes that the advantages of IP telephony will become even clearer once authorities in the GCC region fully embrace this technology.

"IP telephony is secure, safe, and cost effective. Companies can only stand to gain from the technology, but it is a learning curve. Despite this, we have already seen a number of big name customers approach us about adopting IP telephony, and we have a number of other projects in the pipeline," added Al Qanzal.

السادة / شركة المكونات المتحدة الدولية للتقنية المحدودة

شهادة إنجاز أعمال

تتقدم شركة الصالحات القابضة بالشكر والتقدير لشركة المكونات المتحدة الدولية للتقنية المحدودة لجهودها في تقديم الخدمات الإستشارية والفنية لأعمال الأنظمة الكهروميكانيكية لمشروع جدة بارك مول.

حيث انها قامت بتقديم الخدمات التالية لإدارة أعمال المشروع . .

- مراجعة كافة التصاميم الهندسية للأنظمة الكهروميكانيكية للمشروع.
- عمل دراسة الهندسة القيمية " Value Engineering " للمشروع.
- تصاميم توفير الطاقة في المشروع.
- الإشراف الهندسي التنفيذي لجميع الأعمال الكهروميكانيكية فترة تنفيذ المشروع.
- إدارة عملية الإستلام والتسليم لجميع الأعمال الكهروميكانيكية للمشروع.

حيث نشهد بأن جميع الخدمات المقدمة من قبل الشركة كانت متميزة في الأداء والكفاءة والانجاز وتمت بمستوى مهني وحرفي ومطابقة للمواصفات والمقاييس العالمية، وذلك من خلال كوادرها الهندسية المؤهلة، طوال فترة التنفيذ مع تلبية الاحتياجات الاستثنائية التي تطلبها المشروع.

متمنين لهم دوام التوفيق والتقدم.

Professional Certification Program from IBM

International Business Machines Corporation
11400 Burnet Road, Internal Zip 3013
Austin, Texas 78758
USA

Dear IBM Certified Professional, **(3i SOLUTION)**

Congratulations on achieving your certification! Your commitment to increasing your expertise and knowledge with IBM technoloy is an asset to you and your customers. The Professional Certification Program from IBM is designed to distinguish professionls in the IT community as experts in leading-edge technology.

Enclosed is your IBM certificate. Additionally. You have earned the right to display the "IBM Certified" mark, affirming your status as an IBM Certified professional. To obtain your certification mark, please visit the IBM Certification Member Site al: www.ibm.com/certify/members (select "Member Services", then "Certification Marks"). We also ask that you update you update your Address information, including your personal data privacy options. These privacy options help us know how to best communicate with you, and allow you to indicate if you certification status can be provided to others.

The Certification Member site also provides:

+ other Member Services: online access to change your address, merge IDs, and view certification history.
+ Certification Forum: the place to connect and chat with your peers
+ Certification Library: certification documentation and information
+ Just for You: exclusive entitled area related to your certification
+ Did you Know: everything you need to know.. but didn't know to ask
+ What's on Your Mind: tell us what you think about the program

If you are currently employed by an IBM Business Partner, please notify your firm's Authorized Profile Administrator (APA), so that your certification(s) can be included in your firm's Business Partner profile. You will be asked to provide your candidate/testing ID, which authorizes IBM to include any of your IBM Professional Certifications in your company's profile. Certifications are reported to the **IBM PartnerWorld Business Partner Programs** through the PartnerWorld web site at: www.ibm.com/partnerworld.

More information on the Professional Certification Program from IBM is available from our website at: www.ibm.com/certify. If you have any other questions, or need assistance with program information, Please contact us at certify@us.ibm.com. Your feedback is important to us.

Once again, congratulations and welcome!

Best Regards,

The Professional Certification Program from IBM
